

# INDEX TO VOLUME 276

March-April 1983

- Becker, Joseph, Denef, J. and Lipshitz, L. *The Approximation Property for some 5-dimensional Henselian rings*, 301.
- Bendersky, Martin. *The derived functors of the primitives for  $BP_*(\Omega S^{2n+1})$* , 599.
- de Boor, C. and DeVore, R. *Approximation by smooth multivariate splines*, 775.
- Bradley, Richard C., Jr. *On the  $\psi$ -mixing condition for stationary random sequences*, 55.
- Burbea, Jacob. *Inequalities for holomorphic functions of several complex variables*, 247.
- Byers, Bill. *Topological semiconjugacy of piecewise monotone maps of the interval*, 489.
- Capon, Michèle. *Primarité de  $L^p(X)$* , 431.
- Carrell, James B. and Sommese, Andrew John.  *$SL(2, \mathbb{C})$  actions on compact Kaehler manifolds*, 165.
- Chaney, R. W. *A general sufficiency theorem for nonsmooth nonlinear programming*, 235.
- Chapman, T. A. and Ferry, Steve. *Constructing approximate fibrations*, 757.
- D'Atri, J. E. and Dotti Miatello, I. *A characterization of bounded symmetric domains by curvature*, 531.
- Davis, Donald M. *The splitting of  $BO(8) \wedge bo$  and  $MO(8) \wedge bo$* , 671.
- Denef, J. See Becker, Joseph.
- Denman, Richard and Starbird, Michael. *Shrinking countable decompositions of  $S^3$* , 743.
- DeVore, R. See de Boor, C.
- Dolecki, Szymon, Salinetti, Gabriella and Wets, Roger J.-B. *Convergence of functions: Equi-semicontinuity*, 409.
- Dotti Miatello, I. See D'Atri, J. E.
- Durfee, Alan H. *Neighborhoods of algebraic sets*, 517.
- Dutta, Sankar P. *Generalized intersection multiplicities of modules*, 657.
- Ejiri, Norio. *A generalization of minimal cones*, 347.
- Ennis, Christopher. *Sufficient conditions for smoothing codimension one foliations*, 311.
- Escobales, Richard H., Jr. *Bundle-like foliations with Kählerian leaves*, 853.
- Ferry, Steve. See Chapman, T. A.
- Freidlin, M. I. *On wave fronts propagation in multicompet media*, 181.
- Fridman, B. L. *Biholomorphic invariants of a hyperbolic manifold and some applications*, 685.
- Ginsberg, Matthew L. *Scattering theory and the geometry of multi-twistor spaces*, 789.
- Goldfeld, D. and Viola, C. *Some conjectures on elliptic curves over cyclotomic fields*, 511.
- Hamilton, D. H. *The dispersion of the coefficients of univalent functions*, 323.
- Hawkins, Jane. *Smooth type III diffeomorphisms of manifolds*, 625.
- Hewitt, Edwin and Ritter, Gunter. *Conjugate Fourier series on certain solenoids*, 817.
- Hoff, David. *The sharp form of Oleinik's entropy condition in several space variables*, 707.
- Hwang, Jun Shung. *On the generalized Seidel class  $U$* , 335.
- Kaneto, Takeshi. *On genus 2 Heegaard diagrams for the 3-sphere*, 583.
- Kearton, C. *An algebraic classification of certain simple even-dimensional knots*, 1.
- Kierstead, David P. *Syntax and semantics in higher-type recursion theory*, 67.
- Lance, Timothy. *Steenrod and Dyer-Lashof operations on  $BU$* , 497.
- Lee, Yuh-Jia. *A correction and some additions to "Fundamental solutions for differential equations associated with the number operator"*, 621.
- Lipshitz, L. See Becker, Joseph.
- Luecking, Daniel H. and Younis, Rahman M. *Quotients of  $L^\infty$  by Douglas algebras and best approximation*, 699.
- Mafik, Jan and Weil, Clifford E. *Products of powers of nonnegative derivatives*, 361.
- Markowitz, Michael J. *CR-hypersurfaces in a space with a pseudoconformal connection*, 117.
- Markowitz, Michael and Schlaflly, Roger. *Rigidity of pseudoconformal connections*, 133.
- Minda, C. David. *Domain Bloch constants*, 645.
- Morgan, Frank. *On the singular structure of three-dimensional area-minimizing surfaces*, 137.
- Muckenhoupt, Benjamin. *Weighted norm inequalities for the Fourier transform*, 729.
- Pisier, Gilles. *On the dimension of the  $l_p^p$ -subspaces of Banach spaces, for  $1 \leq p < 2$* , 201.
- Rice, M. D. and Tashjian, G. J. *Cartesian-closed coreflective subcategories of uniform spaces*, 289.
- Ritter, Gunter. See Hewitt, Edwin.
- Rodin, Burton and Warschawski, S. E. *A necessary and sufficient condition for the asymptotic version of Ahlfors' distortion property*, 281.
